---

## Professional Experience

### Management

- Acting CIO at the US House of Representatives with a \$350M budget
- IT Strategy generation to meet business needs
- Strong team development resulting in motivated employees, excellent performance, and high personnel retention
- Led and mentored managers and individual contributors to achieve strong results
- Flexible, innovative solutions to long term and emergent business needs
- Ability to gain customer confidence resulting in additional scope and budget
- On time, on budget project delivery
- Established an IS Steering Committee to optimize utilization of limited resources
- IT budget preparation and re-appropriation actions to maximize budget effectiveness
- Program Control leadership to include Risk Management, Earned Value Management (EVM), Program Management Plan (PMP), and Integrated Master Schedules (IMS)
- Sub-contractor management and contract negotiations skills
- Excellent presentations to executive management and non-technical audiences
- Mainframe transition and technical re-tooling of personnel
- Internal consulting to maximize support for, and communications to, business units
- Infrastructure and application integration of acquired business

### Software Engineering

- COTs implementation and integration experience on multiple packages (banking, financial, ERP, and content management)
- Software engineering, testing, and configuration management process improvements
- New product generation through Business Intelligence
- Data Architecture leadership
- Architecture methodology implementation
- Data Migration and software migration planning and execution
- Recommended business and technical options for the reconciliation of individual SAP and JD Edwards ERP environments
- Led an enterprise data warehouse project supporting the implementation of a financial ERP
- Architected a distributed database and application model, with dual direction replication
- Aggressively managed simultaneous IT projects for both mainframe and client server applications
